THE IDEAL ALL-POSITION TIRE FOR ON-AND OFF-HIGHWAY OPERATIONS

The MY507™ is an aggressive all-position, conventional profile radial tire for on-and-off-highway logging, cement and construction operations. Utilizing Yokohama’s revered STEM-2 technology, this tire offers improved retreadability and longer overall casing life, while its sturdy, wide-tread construction and thick undertread protect against cutting and chipping.

HIGH MILEAGE DURING ORIGINAL TREADLIFE

- **Two protection chafers-steel and nylon** provide double strength and reliability to add extra life to the tire.
- **With up to 26/32” tread depth**, the MY507 delivers incredible steer-axle and all-position mileage during original treadlife.

PROTECTED FROM HEAT GENERATION AND STONE DAMAGE

- **High strength belt construction** protects against rust and stone penetration damage, while minimizing tread distortion and heat generation.

TOUGH CASING AND RELIABLE TRACTION

- **Four-rugged contra-diagonal ribs with buttressed shoulders** give full directional stability on steering axles, as well as excellent traction and braking on drive axles.
- **Wide, block-type rib pattern** increases block rigidity, provides outstanding wear resistance, and delivers excellent traction in mud, snow and wet conditions.
- **Funnel-shaped grooves** help prevent stone retention and injury to belt package, extending casing integrity.

IT’S IN OUR DNA.

Our innovative business philosophy, SmartSolution™, is our commitment to meeting the most essential demands of today's fleets: Longevity, Efficiency, Availability and Dependability.
