MORE FEATURES FOR EVEN MORE VALUE.

We’ve made it our goal to ensure that we’re always offering strong, reliable performing products that serve as an exceptional value for fleets as well as owner/operators. The RY617™ has all the traditional Yokohama qualities that savvy buyers have come to rely upon, along with the latest features that deliver long, even wear, enhanced wet traction and durability.

OPTIMIZED TREAD DESIGN FOR LONG, EVEN WEAR

- **18/32” Tread Depth**
  Delivers extended removal mileage.

- **Contoured Designed Groove Walls**
  Provide added rib stiffness that combat uneven wear.

REDUCED STRAIN AND CONTROLLED CASING GROWTH

- **Stress Wear Control Groove (SCG)**
  Reduces contact pressure at the tread edge, providing increased resistance to shoulder step ensuring longer wear.

CONFIDENT HANDLING WITH ADVANCED PROTECTION

- **STEM-2 Technology (StrainEnergy Minimization)**
  Extends the life of the casing by directing destructive stress forces away from critical bead and shoulder areas minimizing flex in the casing.

- **Five-Rib Tread Design**
  Includes over 6,000 sipes that provide excellent water evacuation and uniform wear. Special stress control sipes are especially effective in combating river wear.

- **Stone Ejectors**
  Deep in the tread grooves keep stones from embedding into the tire to minimize drill damage for increased durability and casing life.

IT’S IN OUR DNA.

Our innovative business philosophy, SmartSolution®, is our commitment to meeting the most essential demands of today’s fleets: Longevity, Efficiency, Availability and Dependability.

Our RY617 is one of many Yokohama tires designed to meet SmartWay’s stringent low rolling resistance criteria.
